

WHY YOU NEED THE TRAINING PROGRAM FOR POOL / SPA OPERATORS

Over the years, thousands of men and women have qualified as swimming pool and spa operators through the National Swimming Pool Foundation. Now NSPF, through updated and improved training, certifies those who pass the course as Certified Pool/Spa Operator (CPO) and gives them a permanent registration number.

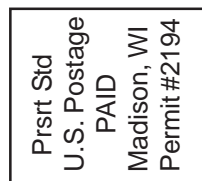

The CPO seal of approval is assurance to pool and spa owners, from motels to Olympic size municipal and college pools, that their facilities and their swimmers are under the supervision of trained professionals. The CPO is trained in the most advanced techniques in safety, water chemistry, maintenance, and management.

The rapid advance in know-how and technology of pool operation require constant updating skills. With over 7.5 million pools in use the need for qualified operators is greater than ever. And the need will continue to grow. Certified Pool Operators must keep the facility in good operational order and maintain the equipment. Only an individual with suitable training and experience is qualified to meet such responsibilities.

As designed by the foundation's consulting specialists, this certification program provides standardized instructional literature and visual aids of immediate value to all pool operators. With the adoption of the proposed Wisconsin Department of Health Regulations, the NSPF CPO will be the required level of training.
